CeBIT (Hannover)--March 4, 2005 -- PCMCIA, the leading technology trade association for PC Card technology, (CeBIT Hall 19, Booth C14/1) today showed the first group of products to pass the rigorous ExpressCard compliance program. Dell, Fujitsu, HP, IBM, Intel, Lexar Media, Microsoft, SCM Microsystems, Texas Instruments and Toshiba are among those supporting development of the ExpressCard standard. The standard is the next-generation PC Card technology for high-performance I/O expansion for desktop and mobile systems, including flash memory, communications, multimedia and security. www.expresscard.org
