

For: Notebook computers with ExpressCard slots

## Why ExpressCard™?

ExpressCard, the new standard destined to replace CardBus, effectively quadruples the amount of available computing bandwidth. This results in faster music downloads, smoother streaming video, and lightning-fast access to mass-storage devices.

## Add expansion ports to your notebook computer

Belkin's full line of upgrade cards allows you to add Serial ATA, FireWire®, or USB 2.0 ports to your computer through the new ExpressCard slot. Belkin ExpressCards are designed to take advantage of the additional bandwidth and features provided by the new ExpressCard I/O interconnection standards. Belkin ExpressCards not only allow you to simultaneously edit high-resolution graphics to share with family and friends, convert music to digital formats, and watch streaming video, they will also support bandwidth-intensive applications of the future.

## Benefits

- Adds expansion ports to your computer using new ExpressCard technology
- Future-proofs your computer to support tomorrow's bandwidth-intensive applications
